TROPICAL CYCLONE BULLETIN NO. 7

Tropical Depression “GARDO”

Issued at 5:00 AM, 01 September 2022

Valid for broadcast until the next bulletin at 11:00 AM today

HAZARDS AFFECTING LAND AREAS
“GARDO” is unlikely to directly affect the weather condition in the country within the forecast period.
HAZARDS AFFECTING COASTAL WATERS
The tropical depression is unlikely to directly affect the sea conditions over the coastal waters of the country.
TRACK AND INTENSITY OUTLOOK
Tropical Depression “GARDO” is forecast to track northwestward to westward over the Philippine Sea east northeast of Extreme Northern Luzon as it merges itself with the larger circulation of Super Typhoon “HENRY”. Thereupon, “GARDO” will weaken into a Low-Pressure area within 12 hours or sooner.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
