

TROPICAL CYCLONE BULLETIN NO. 01F
Super Typhoon JOSIE (NANMADOL)
Issued at 11:00 PM, 16 September 2022

TYPHOON "INDAY" REMAINS SLOW-MOVING OVER THE EAST CHINA SEA AND IS NOW OUTSIDE THE PHILIPPINE AREA OF RESPONSIBILITY (PAR).

Location of Center (10:00 PM)

The center of the eye of Super Typhoon INDAY was estimated based on all available data at **1,375 km East Northeast of Extreme Northern Luzon (Outside the PAR) (25.1°N, 134.4°E)**

Intensity

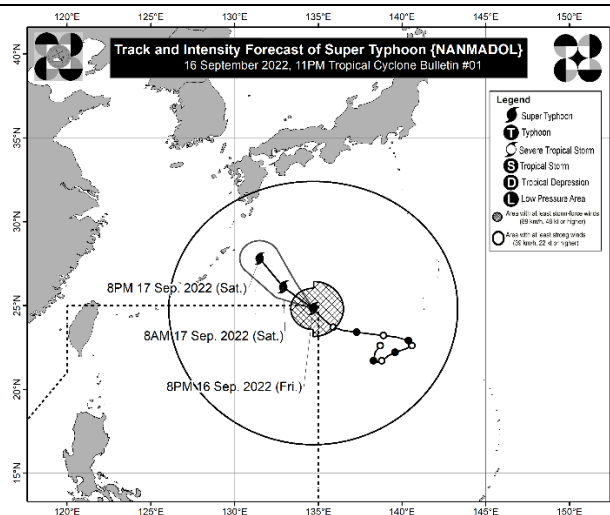

Maximum sustained winds of **185 km/h** near the center, gustiness of up to **230 km/h**, and central pressure of **930 hPa**

Present Movement

Northwestward at 15 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to **960 km** from the center

TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 8:00 AM 17 September 2022	26.1	132.9	1,275 km East Northeast of Extreme Northern Luzon (Outside the PAR)	195	STY	NW 20
24-Hour Forecast 8:00 PM 17 September 2022	27.8	131.5	1,250 km Northeast of Extreme Northern Luzon (Outside the PAR)	185	STY	NW 20

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

No Tropical Cyclone Wind Signal is currently in effect.

TROPICAL CYCLONE BULLETIN NO. 01F
Super Typhoon JOSIE (NANMADOL)
Issued at 11:00 PM, 16 September 2022

HAZARDS AFFECTING LAND AREAS
<p>Heavy Rainfall STY JOSIE is unlikely to directly bring heavy rains in the country throughout the forecast period. However, the Southwest Monsoon that it enhanced may bring monsoon rains over Western Visayas and portions of the western section of Southern Luzon. For more information, refer to Weather Advisory #4 issued at 11:00 PM today.</p> <p>Severe Winds In the next 24 hours, occasional gusty conditions reaching strong breeze to near-gale strength due to the Southwest Monsoon enhanced by STY JOSIE will be experienced (especially in the coastal and mountainous/upland areas) over Visayas, MIMAROPA, and Bicol Region.</p>
HAZARDS AFFECTING COASTAL WATERS
<p>STY JOSIE remains less likely to bring rough seas over the coastal waters of the country which may result to risky conditions to mariners of small seacrafts.</p>
TRACK AND INTENSITY OUTLOOK
<ul style="list-style-type: none">• STY JOSIE entered and exited the PAR region at 5:40 PM and 10:00 PM today, respectively. This tropical cyclone is forecast to continue tracking northwestward towards the northern portion of the Ryukyu Islands and the southern portion of mainland Japan.• JOSIE reached super typhoon category at 8:00 PM today following a period of rapid intensification, making it the second super typhoon within the PAR region for this tropical cyclone season. It will likely continue intensifying in the near term due to highly favorable conditions.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless a re-entry in the PAR region occurs, this is the **only bulletin** for this tropical cyclone. Succeeding updates will be provided in the 24-Hour Public Weather Forecast at 4:00 AM tomorrow.
