

TROPICAL CYCLONE BULLETIN NO. 29

Tropical Depression "AGATON" (MEGI)

Issued at 5:00 PM, 12 April 2022

Valid for broadcast until the next bulletin at 8:00 PM today

"AGATON" REMAINS ALMOST STATIONARY OVER LLORENTE, EASTERN SAMAR

Location of Center (4:00 PM)

The center of Tropical Depression "AGATON" was estimated based on all available data **in the vicinity of Llorente, Eastern Samar (11.3°N, 125.5°E)**

Intensity

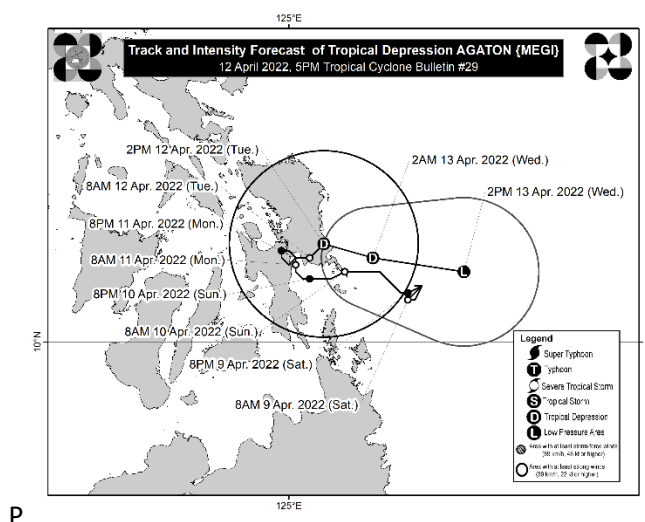

Maximum sustained winds of **45 km/h** near the center, gustiness of up to **75 km/h**, and central pressure of **1002 hPa**

Present Movement

Almost Stationary

Extent of Tropical Cyclone Winds

Strong winds or higher extend outwards up to **150 km** from the center

TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 2:00 AM 13 April 2022	11.2	126.3	Over the coastal waters of Guiuan, Eastern Samar	45	TD	ESE slowly
24-Hour Forecast 2:00 AM 13 April 2022	11.0	127.6	205 km E of Guiuan, Eastern Samar	-	LOW	E 10

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

TCWS No.	Luzon	Visayas	Mindanao
1 (39 – 61 km/h Strong winds prevailing or expected within the next 36 hours)	-	Eastern Samar, Samar, Northern Samar, Biliran, Leyte, Southern Leyte, and Camotes Island	Dinagat Islands
Potential impacts of winds: Minimal to minor threat to life and property			

TROPICAL CYCLONE BULLETIN NO. 29

Tropical Depression "AGATON" (MEGI)

Issued at 5:00 PM, 12 April 2022

Valid for broadcast until the next bulletin at 8:00 PM today

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall

- **Today:** Moderate to heavy with at times intense rains over Eastern Visayas, Sorsogon, Masbate, the northern and central portions of Cebu including Bantayan and Camotes Islands, Aklan, Capiz, Iloilo, Antique, Guimaras, and the northern and central portions of Negros Provinces. Light to moderate with at times heavy rains over MIMAROPA, Dinagat Islands, Zamboanga del Norte, Quezon, and the rest of Bicol Region and Visayas.
- Under these conditions and considering significant antecedent rainfall, **scattered to widespread flooding (including flooding) and rain-induced landslides are still expected** especially in areas that are highly or very highly susceptible to these hazard as identified in hazard maps.

Severe Winds

- Strong winds (strong breeze to near gale conditions) will be experienced within any of the areas where Wind Signal No. 1 is currently in effect.

HAZARDS AFFECTING COASTAL WATERS

- In the next 24 hours, rough seas (2.8 to 4.0 m) will prevail over the seaboard of areas where Wind Signal No. 1 is hoisted. **These conditions may be risky for most seacrafts.** Mariners of small seacrafts are advised to remain in port or take shelter, while those operating larger vessels are advised to take precautionary measures when venturing out to sea and, if possible, avoid navigating in these conditions.
- In the next 24 hours, moderate to rough seas (1.2 to 3.7 m) will also prevail over the remaining seaboard of the country that are not under any wind signal or gale warning, especially over the northern and eastern seaboard of Luzon and the eastern seaboard of Visayas and Mindanao. **These conditions may be risky for those using small seacrafts.** Mariners are advised to take precautionary measures when venturing out to sea and, if possible, avoid navigating in these conditions.

TRACK AND INTENSITY OUTLOOK

- "AGATON" is forecast to continue moving slowly eastward within the next 6 to 12 hours before turning more east southeastward towards the Philippine Sea beginning tonight or tomorrow morning. Considering the continuing erratic nature of its movement, the track forecast of "AGATON" may likely change in the succeeding bulletins.
- Due to the combined effects of land interaction, increasing vertical wind shear, and the effects of the upper-level outflow of Typhoon "BASYANG", this tropical depression is forecast to deteriorate into a remnant low within the next 24 hours. The remnant of "AGATON" will then continue tracking generally eastward over the Philippine Sea as it becomes assimilated within the circulation of "BASYANG".

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 8:00 PM today.
