TROPICAL CYCLONE BULLETIN NO. 2F

Typhoon "BASYANG" (MALAKAS)

Issued at 5:00 PM, 12 April 2022

HAZARDS AFFECTING LAND AREAS

"BASYANG" is unlikely to directly affect the weather condition in the country within the forecast period.

HAZARDS AFFECTING COASTAL WATERS

The typhoon is unlikely to directly affect the sea conditions over the coastal waters of the country within the forecast period. However, swells resulting from this tropical cyclone is forecast to generate moderate to rough seas over the northern and eastern seaboard of Luzon and the eastern seaboard of Visayas and Mindanao. **These conditions may be risky for those using small seacrafts.** Mariners are advised to take precautionary measures when venturing out to sea and, if possible, avoid navigating in these conditions.

TRACK AND INTENSITY OUTLOOK

- "BASYANG" left the Philippine Area of Responsibility at 1:00 PM today. The typhoon is forecast to move generally north northeastward throughout the forecast period.
- This tropical cyclone is forecast to continue to intensify and may reach a peak intensity of 155 km/h tomorrow afternoon.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless re-entry occurs, **this is the final bulletin for this tropical cyclone.** Succeeding updates will be incorporated in the 24-Hour Public Weather Forecast at 4:00 AM tomorrow.
